Professional Summary

Software Engineer with experience in backend development using Golang, Python, PostgreSQL and cloud technologies. Specialized in REST API development, database optimization, modular architectures, automated testing and scalable cloud deployments. Strong focus on maintainability, software quality and performance optimization.

Professional Experience

Appointmently — Backend Developer (Golang/Python)

Feb 2024 – Mar 2026

- Led the design and development of 30+ REST APIs using modular backend architecture.
- Developed and maintained backend microservices using Golang, Python, SQLC and PostgreSQL.
- Optimized complex SQL queries and JSONB data structures for better performance.
- Achieved over 95% automated test coverage using Testify and SQLMock.
- Managed cloud deployments using AWS EC2, S3 and Lambda with Docker and Kubernetes.
- Integrated monitoring and observability solutions using Prometheus and Loki.

Global Gas — Web Developer

Jun 2023 – Feb 2024

- Collaborated in the migration from a Java monolith to Node.js microservices.
- Developed authentication and error-handling middlewares for backend APIs.
- Improved technical documentation and onboarding processes using Postman.
- Participated in technical requirement analysis and backend service improvements.
- Worked on maintenance and improvements of a Java-based monolithic system, implementing modifications and optimizations before its migration to a microservices architecture

Freelance — Full Stack Developer

2024 – Present

- Built full-stack web applications using React/Next.js and Golang backends.
- Implemented REST APIs and backend business logic using Golang and PostgreSQL.
- Designed scalable layered architectures using handlers, services and repositories.

- Optimized PostgreSQL relational structures and SQL query performance.
- Configured hosting, SSL certificates and deployment environments.

Technical Skills

Languages: Golang, TypeScript, Python, Java.

Backend: REST APIs, SQLC, Microservices, Modular Architecture.

Databases: SQL, PostgreSQL, JSONB, Query Optimization.

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD.

Testing: Testify, SQLMock, Unit Testing (+95% coverage).

Monitoring: Prometheus, Loki.

Frontend & Web: React, Next.js.

Tools: Git, GitHub, Postman, DBeaver.

Languages: Spanish (Native), English (B2).

Productivity & AI Tools: Claude Code, Cursor, GitHub Copilot, ChatGPT, AI-assisted development and debugging workflows.

Education

Tecnológico Superior de Jalisco

Bachelor's Degree in Computer Systems Engineering

2019 – 2023

Professional License: 15228724
